FLEXIBILITY, economy, and comfort are the keynote to this new line of furniture. The entire group has been designed with a focus on quantity production, minimum labor in manufacture and assembly, and rapid delivery. . . . The system of construction allows for the use of non-essential materials without sacrifice to comfort, design, or durability. . . . The chair units, built for practical use, fit various frames thereby making arm chairs, armless chairs, and settees of two or three units. . . . Solid Birch table tops have tapered edges adding lightness to the form. Their standardized legs can be had in various lengths and are removable for additional facility in shipping. . . . Because of the flexible nature of this furniture it is not limited to residential work but can be planned for use in factory recreation rooms and lounges, U.S.O. centers, offices, etc. . . . Orders will be given immediate attention. Prompt delivery is assured. . . . **All designs by Jens Risom.** PATENTS PENDING
